

Automate Access Cost Management. **Protect Margins.** **Grow Without Headcount.**

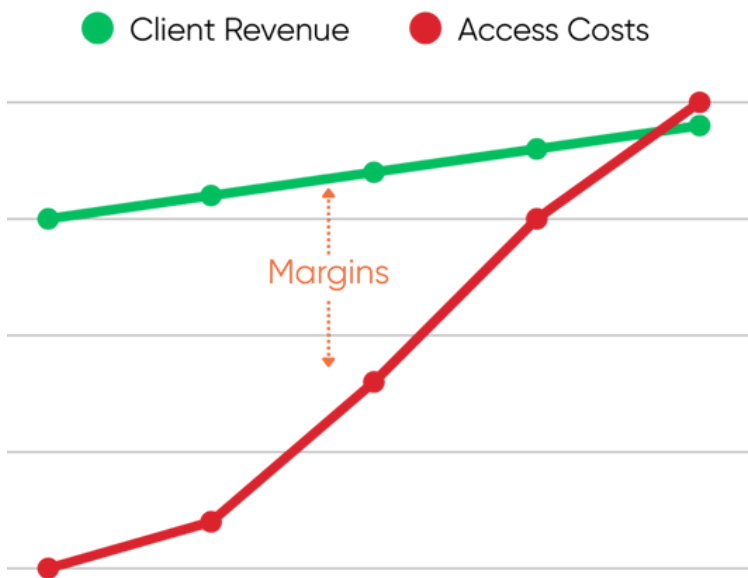

When Every Circuit Touches Revenue, Accuracy Isn't Optional.

Your CSP business is growing, but your AP and billing teams aren't. AMI helps you automate invoice entry, rebilling, and cost validation so you can handle more clients, more invoices, and more profit without hiring more people.

As a Communication Service Provider...

Your margins depend on network providers billing what you negotiated, not what slips through. But behind the scenes, your Accounts Payable and Billing processes are still manual, built for a smaller business than the one you've become.

But without the right tools, the effort to protect margins often costs more than the margins themselves.

- Bills are entered manually every month, leaving little time for your team to confirm invoice accuracy.
- Rebilling means copying, flipping, and re-entering the same data across systems.
- Contracts expire quietly, then show up later as unexpected cost spikes.
- Taxes and surcharges are hard to decipher and even more difficult to validate.
- Profitability checks depend on pivot tables and manual reconciliations.

The result is fragile margins and constant risk.

You shouldn't need to hire three more people just to keep things afloat.

100%

Scalable operations without new hires

The Partner Who Automates AP and **Understands** Your Business

AP Automation Alone Is Not Enough

Most AP automation tools know how to move invoices.

But they don't understand carrier invoices.

For over 30 years, AMI has helped Communication Service Providers, carriers, and resellers turn manual carrier billing into automated, auditable financial control.

We do more than offload the busy work.

We understand how carriers price services, structure contracts, apply discounts, and change rates over time.

An extension of your team. No training required. Delivering real results where generic AP systems and ERPs fall short.

How AMI Turns Guesswork Into Margin Confidence

1

Get Your Inventory Right

During implementation, invoice data is enriched with contractual, circuit, financial, and customer pricing details so your inventory accurately reflects what you buy, sell, and bill.

2

Automate the Busywork

In your monthly race for financial reporting, automated invoice capture, validation, and rebilling runs in the background instead of on your team.

3

Assure Revenue & Profit

Identify and validate every MRC and NRC rate, SLA, tax, and surcharge down to the line item. No expired incentive, incorrect USF rate, or misbilled charge slips through unnoticed.

You Can't Out-Hire Inefficiency. **But You Can Automate It.**

AMI helps CSPs scale operations, protect margins, and grow profitably – even when budgets can't.

Let's Build Your CSP Profitability Engine.

Without AMI:

Your AP team stays buried in data entry, contracts expire unnoticed, and revenue assurance remains an educated guessing game.

With AMI:

Access Cost Management runs itself, your data stays clean, and your profit margin grows without a single new hire.

Efficiency Is the New Growth Strategy

Stay Focused on Strategic Work

Take invoice processing, audits, and disputes off your team's plate without growing your staff.

Verify Every Rate, Charge and Change

Career analysts backed by industry-leading automation ensure every dollar you spend is accurate and optimized.

Maintain a Complete, Centralized Inventory

Invoice and contract data come together with Salesforce and ServiceNow feeds to create a single, accurate inventory

Instant Access to Contracts and Terms

Everything is organized, searchable, and linked to its services.

Stay Ahead of Every Renewal

Alerts give you time to review, renegotiate, or replace contracts well before they term.

Get Clear Customer-Level Profitability

Understand true customer profitability by aligning what you pay for services with what you bill.

AP System Integration

We deliver weekly funding reports into your AP system, and surface the invoices that need attention while approved disputes run in the background.

Salesforce Integration

Salesforce provides your end-client data that ensures every invoice, contract, and service is rationalized to the right customer.

ServiceNow Integration

Automatically convert your closed NOC outage tickets from into SLA disputes so downtime never goes unchallenged.

Optional Services to Lighten Your Load

Benchmarks & Bids

See how your rates benchmark against the market and gathers competitive quotes

Order & MACD Support

Managed orders and changes, tracks milestones, joins vendor calls, and ensures accurate billing.

Transfer of Liability Services

Get service transfers handled when you acquire new entities and auto add the invoices to our system

The Success Stories

Transforming Network Resale Operations

Following the merger of seven different companies into one, a circuit wholesaler inherited a complex network inventory. The organization faced mounting challenges in cost allocations, contracts, vendor disputes, and billing accuracy.

- ✓ \$300K recovered in one year
- ✓ 84% reduction in late fees
- ✓ No additional headcount required
- ✓ Centralized contracts and cost visibility improved reporting

Giving a Telecom Service Provider \$5M Reasons to Celebrate

This AMI client is a key player in the technology infrastructure ecosystem, supporting a wide range of corporate customers, including many Fortune 1000 companies.

- ✓ \$5.6M+ in recovered vendor charges
- ✓ 50+ carriers, 500+ invoices, \$70M in annual spend automated
- ✓ Full AP and rebilling automation with EDI feeds and branded client portals
- ✓ Integrated with Salesforce and ServiceNow for change validation and outage tracking

"We needed a team. Instead of growing it internally, we wanted a package where all the information and assistance in one place without having to fight for headcount. With AMI, I don't have to work 15 hours a day anymore. They handles disputes, follows up, and keeps tabs so I can focus on other priorities."
